RETORT ROOM ACCESSORIES

FOR RETORT STERILIZER APPLICATIONS

STOCK America can supply all the necessary accessories for retort sterilizer applications. Typically, applications involving rigid containers (glass jar and cans) require the use of steel cages and divider mats. Applications involving semi-rigid containers and pouches typically require the use of stackable racks. Depending on the type of rack involved, a metal tray base may be required to support the stacks of racks. For all applications which do not justify the use of automated conveyor systems, the cages are transported outside of the retorts using trolleys.

Cages, Trolleys, Tray Bases,
and Divider Mats

Racks/Trays
Stainless Steel, Adjustable Plastic,
Injection Molded

Loaders, Unloaders, Carts, Specialty Equipment
