MULTI-PROCESS PILOT RETORTS WITH OPTIONAL OSCILLATING MOTION

Models

- AP-95 - Static
- APR-95 - Oscillating and Rotary (End-over-end)
- APR-95-SV - Oscillating and Rotary with water immersion option

Applications

- Process development/optimization for food/pharmaceutical products either for pasteurization or commercial sterilization utilizing all container types
- Simulation of new recipes and processes for existing products/containers
- Production of small runs for market studies

Processes

- Steam water spray with air overpressure
- Saturated steam with air overpressure cooling
- Water Immersion

Optional

- Linear deflection container test equipment for automotive overpressure profile development
- Setup for your choice of data collection equipment
